

Wedding Management System

1. Stakeholder Management & Requirement Gathering

Stakeholders

- Clients (Couples)
- Vendors (Photographers, Caterers, Decorators)
- Admin
- Wedding Planners

2. Business Requirement

Business Goals

- Reduce manual coordination
- Improve booking efficiency
- Avoid vendor conflicts
- Track budget in real-time

Key Requirements

- Vendor booking system
- Budget tracking
- Approval workflow
- Notification system

3. Functional Requirement

Core Functionalities

- User Registration/Login
- Wedding Plan Creation
- Vendor Booking
- Approval Workflow
- Budget Management

4. User Stories & Acceptance Criteria

As a client, I want to book a vendor, so that I can plan my wedding smoothly without coordination issues.

Acceptance Criteria

Client must be logged into the system

Client can view available vendors

Vendor availability must be checked before booking

Client can select date and service

Booking request is successfully saved

Confirmation message is displayed to the client

As a vendor, I want to update my availability, so that I can avoid double bookings

Acceptance Criteria:

Vendor must be logged into the system

Vendor can select available and unavailable dates

Vendor can update availability for specific services

Changes must be saved successfully

Updated availability must be visible to clients in real-time

System must prevent booking on unavailable dates

As an admin, I want to approve bookings so that I can manage operations.

Acceptance Criteria:

Admin must be logged into the system

Admin can view all pending booking requests

Admin can approve or reject a booking

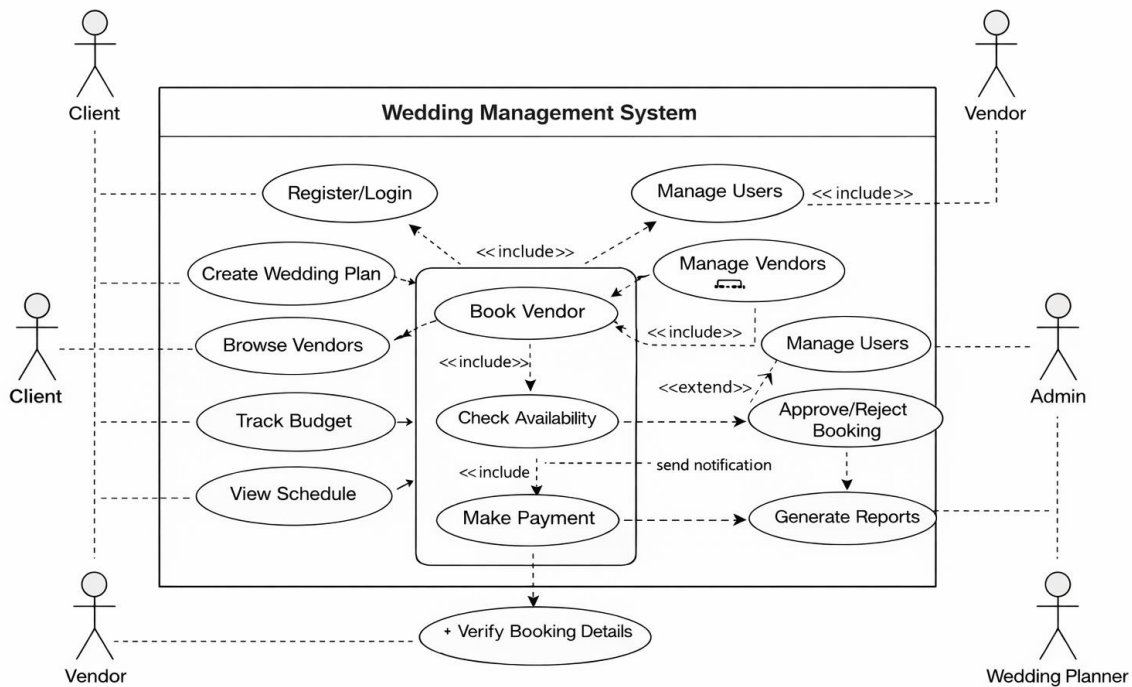

Booking status must update (Approved / Rejected)

Notification must be sent to the client after decision

Approved bookings must be confirmed in the system

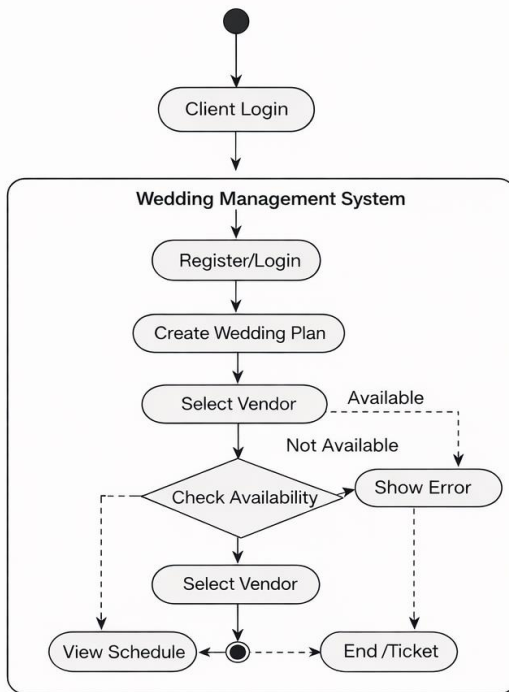

Rejected bookings must not be processed further
